Experience

Prophity — *Front End Developer Intern*
July 2020 - October 2020
- Engineered pixel perfect responsive design prototypes provided by the UI team by utilizing modern front-end technologies such as ANT Design, Sass, and React.
- Created reusable React components and RESTful APIs using Express.js that are utilized throughout live production systems to inform small business owners about the health and performance of their business and marketplace.
- Practiced Test Driven Development (TDD) throughout the internship to develop unit test scripts to ensure platform functionality when new features are engineered.

Open Source Projects

Chat-UI— *React Component Library*
github.com/ruidashen/chat-ui
React.js | Styled-Components| Storybook| React-Spring
- Designed and engineered more than 40 reusable and customizable React components for rapid application development process.
- Utilized React-Spring to deliver seamless user experience.
- [Sample App built with Chat-UI]

E-Commerce Manager — **Content Management System (CMS)**
github.com/ruidashen/react-backend-managment-system
React.js | Redux | Node.js | Express.js | AWS | MongoDB | Mongoose
- Engineered common CMS functionalities by utilizing multiple RESTful apis with Node.js and Express.js.
- Designed and built UI/UX for the CMS in order to allow admin users to create user role content access for teammates.
- Architected an easy to use product management release workflow to allow management to add products with ease.
- [Live Demo]

R-UI — *VUE Component Library*
github.com/ruidashen/R-UI
Typescript | Vue 3.0 | Vue Router | Sass
- Developed a flexible component library by utilizing Vue 3.0's composition api to allow for flexible creation of component logic.
- Developed a set of components including Switch, Button, Tabs and Dialog which are responsive across all devices.
- UI updates get 1.5 to 2 times faster than the same component library built with Vue 2.0.
- [Docs] | [NPM]

Education

California State University, East Bay —B.S., Computer Science

May 2020

Skills

Frameworks:
React.js, Redux, Node.js, Express.js, Vue.js, Bootstrap, Ant Design, Styled-Components, Storybook, React-Spring

Databases:
MongoDB/Mongoose, MySQL, PostgreSQL

Testing:
Mocha, Postman

Deployment:
AWS, Heroku

Tools:
Git, npm, Webpack, RESTful API, OAuth

Languages
Javascript (ES5+)
Typescript
Java
SQL/NoSQL
HTML5
CSS3/SCSS/Less
